Transition to Sustainable Business

Our vision is to achieve long-term business growth alongside the responsible management of natural resources and the environment. We leverage digital technology, data management, and artificial intelligence (AI) to minimize social and environmental impacts for a sustainable future.

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

Environmental Sustainability

CPF is committed to conducting sustainable business by using digital technologies, data management, and artificial intelligence (AI) to protect the environmental in three key areas:

GHG Emissions

Water

Waste

World-class technologies implemented by CPF

Digital Systems and AI

Data Science

Innovation and Technology

CPF is steadfast in **three industry-leading goals** built on our ongoing journey to reduce the environmental impact:

Net-Zero Emissions

Near-term target by 2030

- Reduce GHG emissions from energy use by 42.0%
- Reduce GHG emissions from land use change and land management by 30.3%

Long-term target by 2050

- Reduce GHG emissions from energy use by 90.0%
- Reduce GHG emissions from land use change and management by 72.0%

Water Resource Risk Management

Develop a plan to manage the impacts of flooding, drought, and water scarcity in all high-risk areas, with a commitment to achieving zero liquid discharge from food processing plants. The pilot plant will be completed by 2025.

Zero Waste to Landfill

Adopt circular economy principles by maximizing the use of organic raw materials, transforming by-products into valuable resources, and eliminating single-use plastics across all CPF operations. To achieving zero waste to landfill by 2030.

Passion toward 2030 environmental sustainability across the value chain

with 5,000 million THB investment

SDG Goals Mapping

1 Raw Material

- Traceability System
- Deforestation-free

2 Feedmill

- Smart Feedmill
- Bunker Oil to Cleaner Fuel
- Zero Liquid Discharge
- Zero Waste to Landfill

3 Farms

- Environmentally Friendly Feed
- RE100
- Centralized Biomethane
- Hybrid Biogas
- No Land Use Change
- Zero Liquid Discharge
- Zero Waste to Landfill

4 Ready-to-eat Manufacturing

- Biomass Energy
- Green Building
- Solar Energy
- Smart Data
- EV Transportation
- Zero Liquid Discharge
- Zero Waste to Landfill

5 Consumers

- Sustainable Packaging
- Environmentally Friendly Feed
- Low-Carbon Products

CPF's Journey Towards Net-Zero SBT Setting

February 2022

Show Commitment

Submit statement of purpose for setting the Net-Zero goals

September 2022 – February 2023

Set the Targets

Calculate and set GHG emissions reduction targets according to SBTi requirements

April 2023

Validation

Chosen to join pilot project data audit based on Forest, Land and Agriculture Guidance (FLAG)

July 2023

Approval

Net-Zero SBT approved

August 2023

Announcement

Announced the targets

2024-Present

Follow-Up

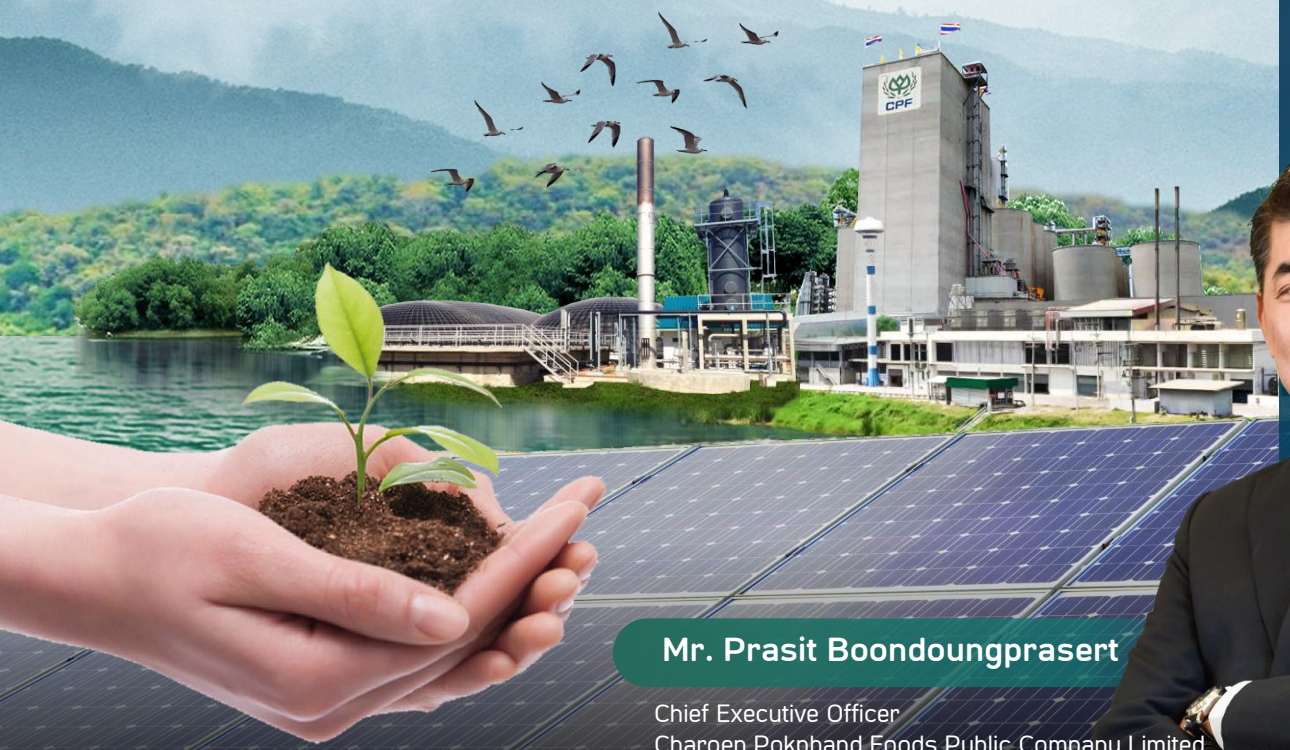

Report GHG reductions to SBTi annually

A Message from Our CEO

Mr. Prasit Boondoungprasert

Chief Executive Officer
Charoen Pokphand Foods Public Company Limited

> CPF commits to achieving Net-Zero greenhouse gas emissions across the value chain by 2050.

GHG Reduction Target against Base Year 2020

Near-term Targets by 2030	42% from energy usage	30.3% from land use change and land management
Long-term Targets By 2050	90% from energy usage	72% from land use change and land management

CPF

is the first food processing company in the world

with near- and long-term FLAG SBT approved by the SBTi in an attempt to limit the global warming to **1.5 °C***

*above pre-industrial levels

Net-Zero Roadmap

2020 Base Year

2025

- **100 MW Solar PV** in Thailand's operations
- **Environmentally Friendly Feed** 100% of CPF-owned farms

2028

- **Deforestation-Free*** for corn, soy, palm oil, cassava of CPF's global operations and paper of CPF Thailand operations

2030

- **Deforestation-Free** for wheat and barley
- **Hybrid Biogas System** 100% of CPF own farms in Thailand and Vietnam
- **No Additional Land Use Change****
- **Coal-Free** In 100% of CPF's global operations
- **Zero Food Waste** 100% of CPF's global operations
- **Sustainable Packaging** 100% of CPF own global operations
- **Cleaner Fuel Conversion** from bunker oil to cleaner fuels

2035

2040

- **Hybrid Biogas System** in 100% of CPF own global farms
- **100% Smart Feedmills** in CPF global operations
- **Decarbonization** in all of CPF upstream road & sea freight
- **Decarbonization** covering 100% of CPF's goods suppliers and capital goods
- **Renewable Electricity** 100% of CPF own global operations
- **Electric Vehicles** 100% of CPF own global operations

2050

Scope 1+3 (FLAG)

Scope 1+2+3 (Non-FLAG)

2030 Target

- FLAG: 30.3%
- Non-FLAG: 42%

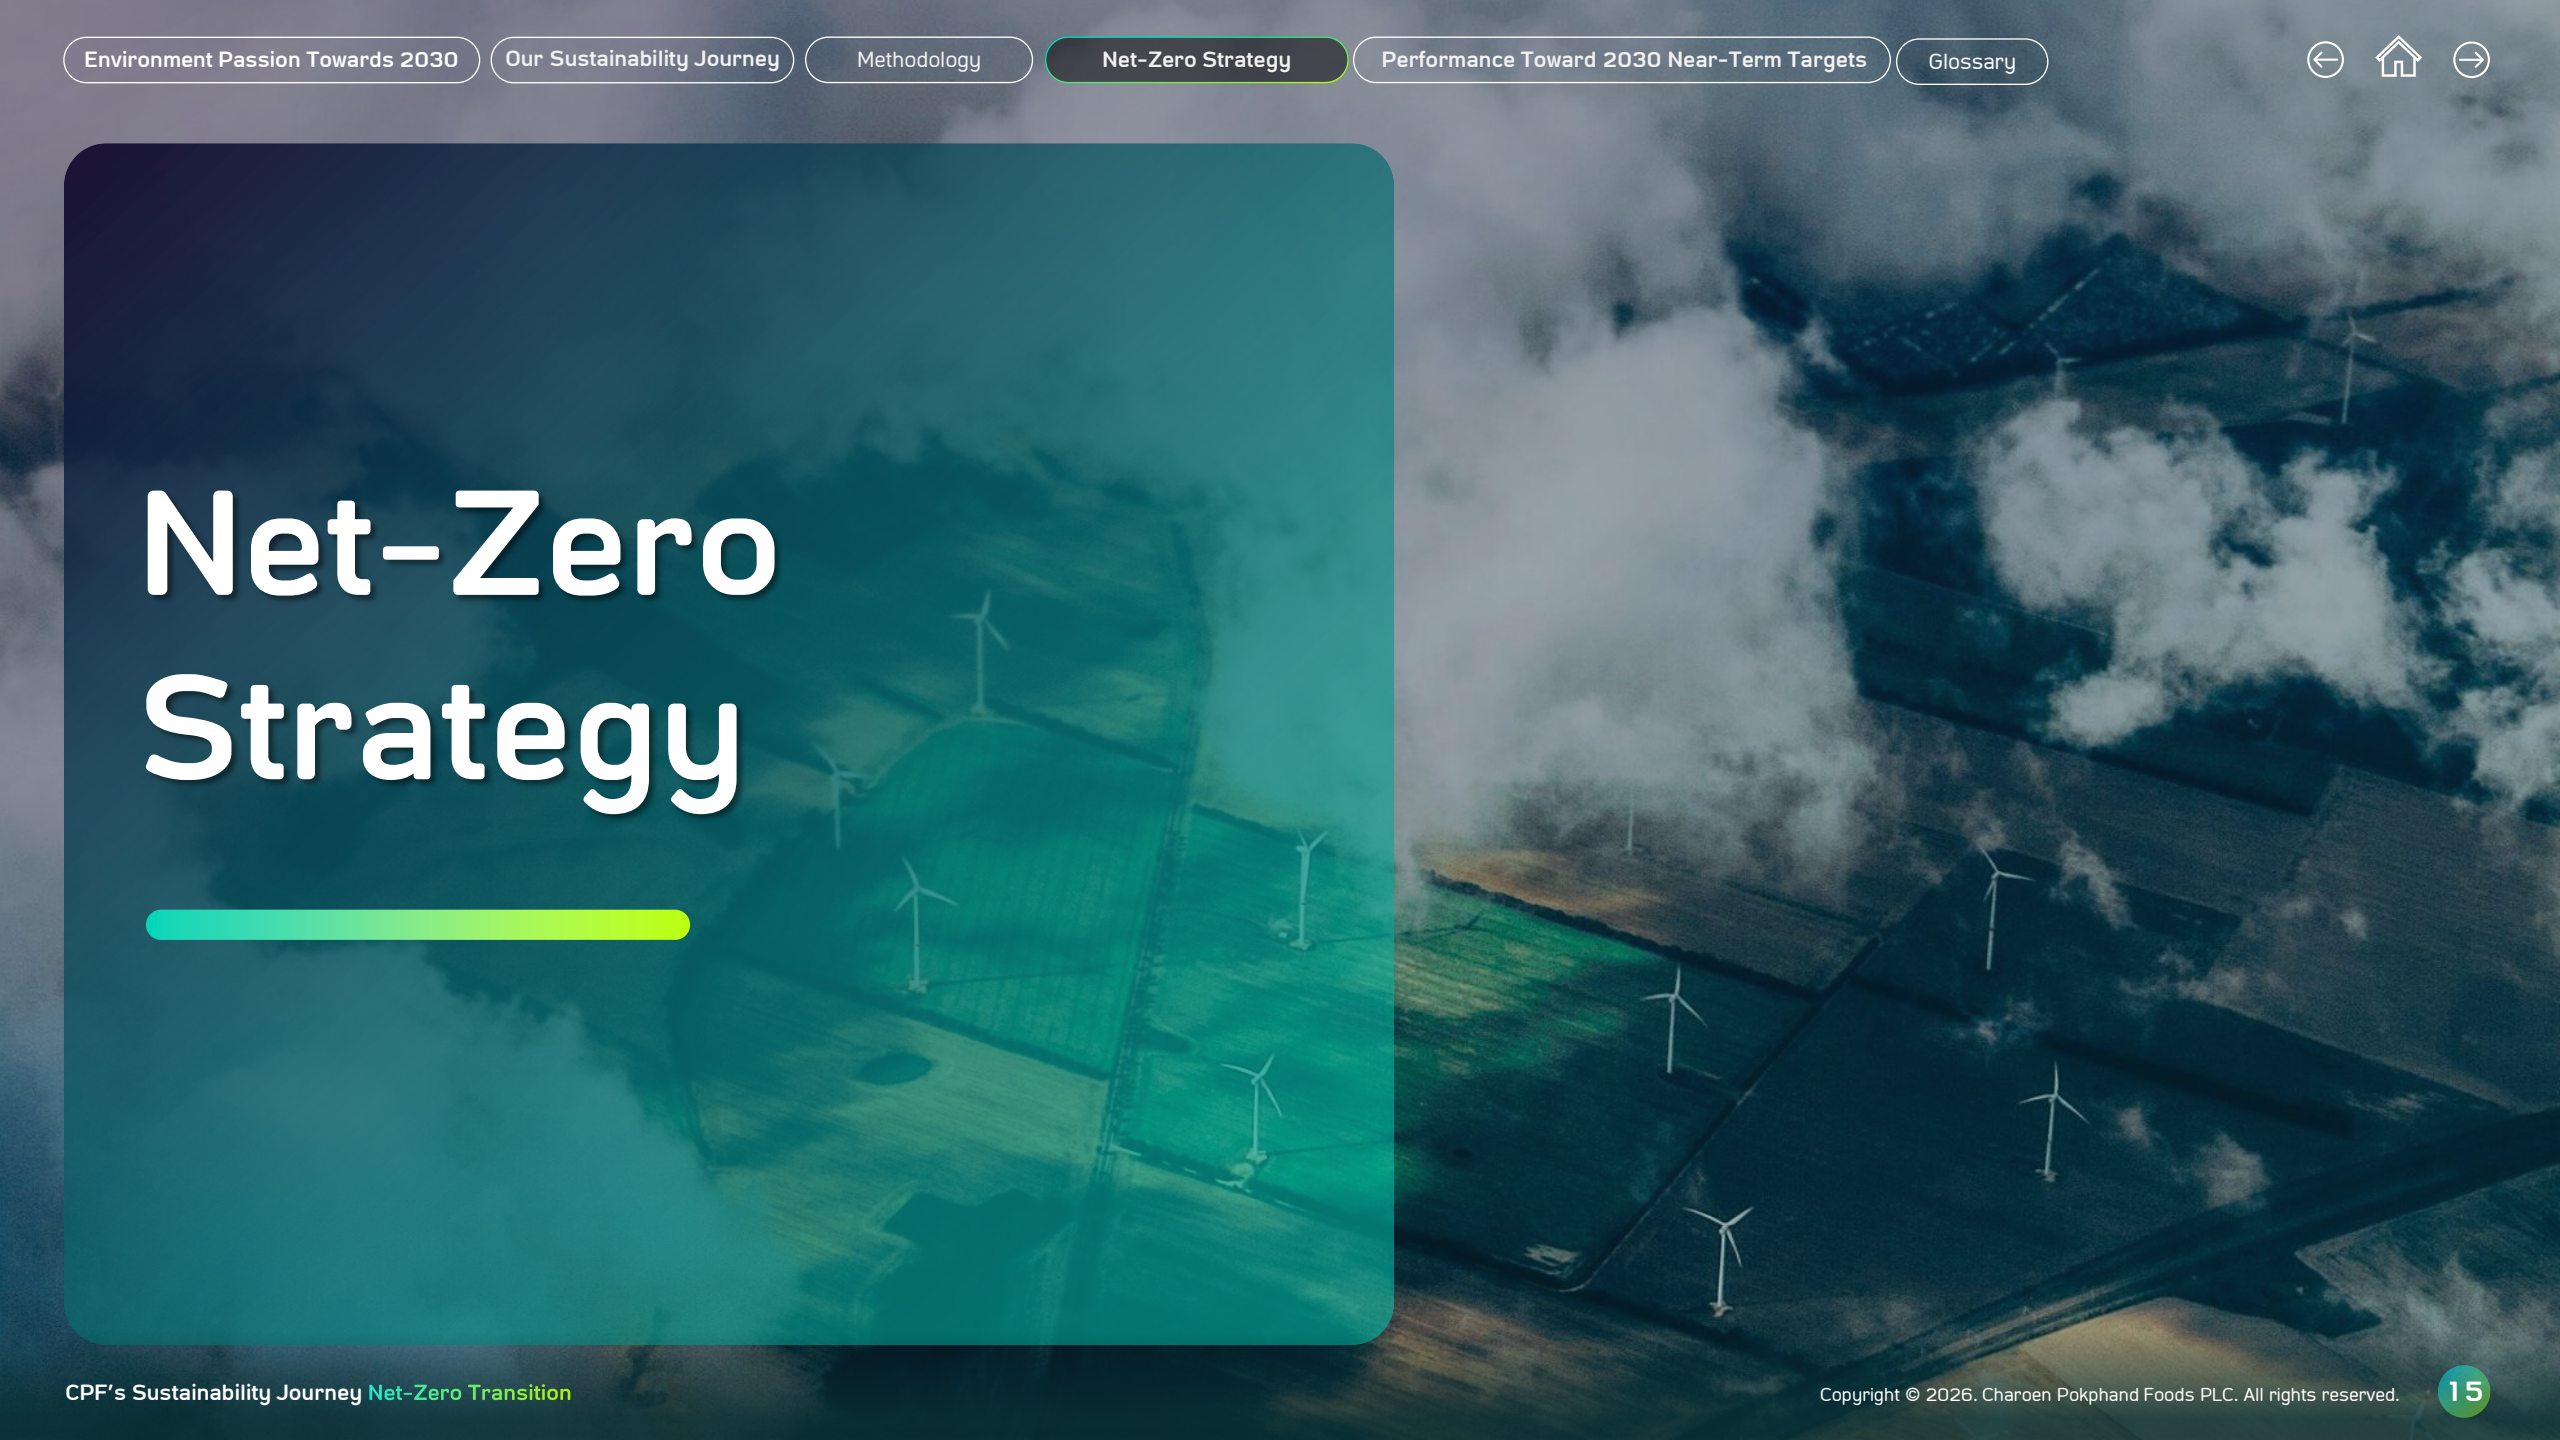

2050 Target

- FLAG: 72%
- Non-FLAG: 90%

* Under the updated SBTi FLAG guidance, companies attempting to extend an existing 2025 deforestation-free sourcing commitment are subject to a hard ceiling of December 31, 2028.
** Agricultural expansion is permitted only on land that was not forested before 2020.

Net-Zero Supply Chain Transition Plan

1

Traceability

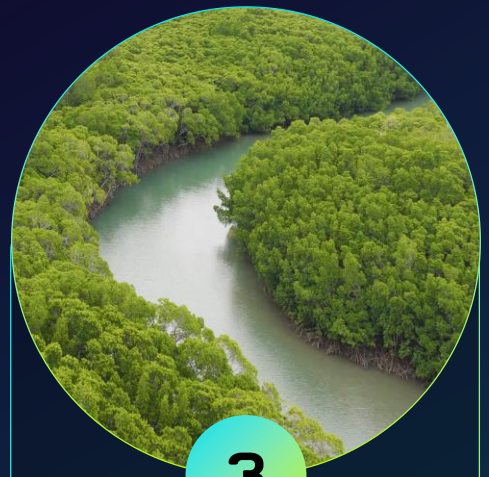

Farm & plot-level polygon map to detect forest encroachment or deforestation overlaps

2

Risk Assessment and Monitoring

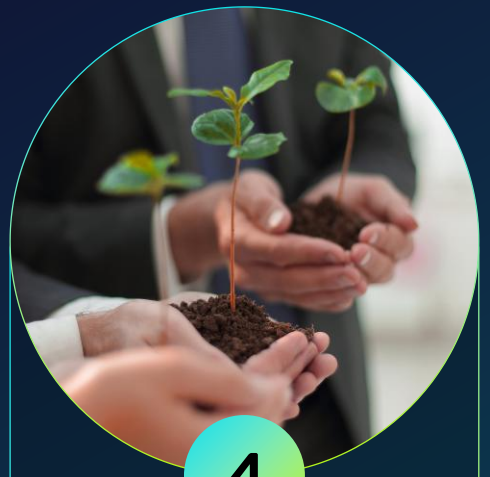

Real-time satellite monitor to detect land use changes and categorize risk of suppliers into high, medium, and low

3

Deforestation-free Policy

Key raw materials purchased must be verified as deforestation-free after the Dec 31, 2020 as the cut-off date.

4

Supplier Management

Focus on capability building, incentives, and strong relationships with farmers to secure a sustainable production base

5

Verification and Reporting

Independent third-party verification and public disclosure to build trust and ensure transparency

Goal: Build a transparent, accountable, and systematic deforestation-free supply chain.

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

1.Traceability

Tier 1 Suppliers

Supplier Identification & Plantation Mapping

Supply chain visibility expansion from Tier 1 suppliers to the source of origins

Beyond Tier 1

Map the supply chain down to the specific farm, plantation, or concession level where feed raw materials are grown

Plot-level geolocation

Map GPS points and polygon boundaries to audit and cross-check plantation areas with forest area maps

Data Integration for Traceability

Integration of purchasing data with plot-level geolocation of plantations

- Purchase data
- Plot-level geolocation

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

2.Risk Assessment and Monitoring

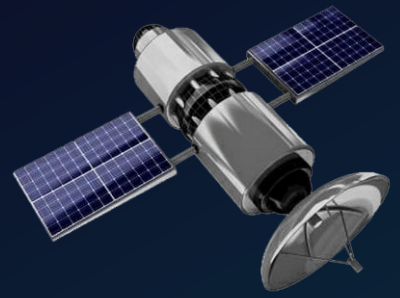

Transition from conventional audits to efficient and real-time risk governance

Proactive Risk Assessment

Supplier Risk Categorization

Classify risk levels of raw material suppliers into high, medium, and low by assessing the probability and impact of deforestation and regulatory non-compliance

Satellite Monitoring

Utilize satellite platforms to detect real-time land-use changes across raw material cultivation areas

Governance & Penalty

Grievance Mechanisms

Establish a formal process for whistleblowers and stakeholders to submit complaints

No-Buy List

Conduct a list of suppliers who violate policies to suspend business dealings

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

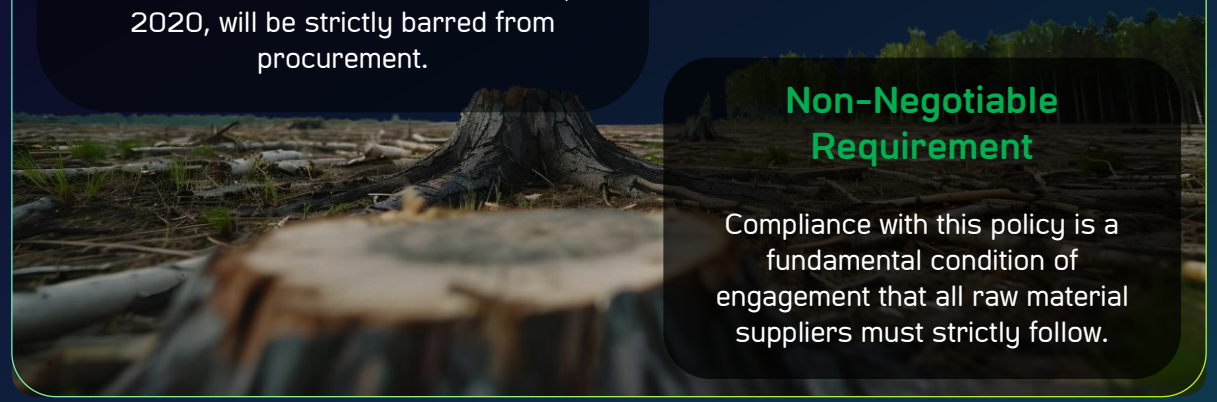

3. Deforestation-free Policy

In 2023, CPF adopted a Deforestation-Free Policy aligned with SBTi standards for corn, soybean, palm oil, and cassava, while working with suppliers to establish a traceability system linked to the Global Net-Zero Platform.

Deforestation-Free Policy

Cut-off Date
31 December 2020

Agricultural raw materials sourced from land deforested after December 31, 2020, will be strictly barred from procurement.

Non-Negotiable Requirement

Compliance with this policy is a fundamental condition of engagement that all raw material suppliers must strictly follow.

Standards & Certificates

CERTIFIED SUSTAINABLE PALM OIL™ RSPO
CERTIFIED
Contains certified sustainable palm oil.
www.rspo.org

RTRS

International Certifications (RSPO & RTRS)

RSPO and RTRS certifications, verified by independent third parties, support raw material traceability and help reduce sourcing risks. However, certification is a risk management tool and does not guarantee 100% compliance or accuracy.

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

4.Supplier Management

Partner with suppliers throughout the transition process through capacity building, incentive programs, and relationship management

Capacity Building & Incentives

Capacity Building

Train smallholders to increase yields on existing plots, eliminating the need for forest encroachment

Incentives

Secure long-term contracts and preferred supplier status for partners with strict environmental compliance

Risk Mitigation & Inclusivity

Relationship Management

Avoid instant contract termination to prevent suppliers from moving to unethical buyers

Smallholder Inclusion

Structure strategies to shield smallholders from the financial burden of compliance data

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.

5.Verification and Reporting

Independent Third-Party Audits

Verify satellite data and raw material traceability datasets

Financial Indicator Linkage

Incorporate deforestation-free sourcing performance into financial cost structures

Public Disclosure of Progress

Publish annual performance metrics on the percentage of deforestation-free supply chains

Copyright © 2026. Charoen Pokphand Foods PLC. All rights reserved.
